

RNF130-BRAF recombinant protein

RNF130-BRAF Mutant (Rex3Bex9), Active

CATALOG # AAA72957	HOST Sf9 insect cells using baculovirus	APPLICATIONS Kinase Assay
------------------------------	---	-------------------------------------

PRODUCT SYNONYMS

RNF130-BRAF; RNF130-BRAF Mutant (Rex3Bex9); Active; RNF130-BRAF recombinant protein

PRODUCT SPECIFICATIONS

Host	Sf9 insect cells using baculovirus
Form/Format	50mM Tris-HCl, pH 7.5, 150mM NaCl, 10mM glutathione, 0.1mM EDTA, 0.25mM DTT, 0.1mM PMSF, 25% glycerol.
Sequence Positions	1-231 exon3 (RNF130) - 381-end or exon 9-18 (BRAF)
Sequence Length	1851
Applicable Applications for RNF130-BRAF recombinant protein	Kinase Assay
Species	Human
Tag	GST tag
Dry Ice Note	The product may be shipped with dry ice, and an additional fee may be added to your shipping cost.
Preparation and Storage	Store product at -70 degree C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for RNF130-BRAF recombinant protein	Description: Recombinant human fusion RNF130 (1-231 exon3)-BRAF (381-end or exon9-18) protein was expressed by baculovirus in Sf9 insect cells using an N-terminal GST tag. Scientific Background: KIAA1549-BRAF is a gene fusion resulting from a tandem duplication event involving the BRAF kinase gene that have recently been identified as the most frequent genetic alteration in many cancers. The KIAA1549-BRAF fusion typically results from a 2.0Mb tandem duplication in chromosome band 7q34 (1). The KIAA1549:BRAF fusion gene is considered a driver genetic event in pilocytic astrocytoma and many other pediatric brain neoplasms. KIAA1549-BRAF fusion gene and BRAF (V600E) mutation may be responsible for deregulation of the Ras-RAF-ERK signaling pathway in many brain cancers (2).
Product Categories/Family for RNF130-BRAF recombinant protein	Enzymes; Active Kinase Mutants

NCBI AND UNIPROT INFORMATION

NCBI GI #	80478635
NCBI GeneID	55819
Molecular Weight	~98 kDa
NCBI Official Full Name	Homo sapiens ring finger protein 130, mRNA
NCBI Official Synonym Full Names	ring finger protein 130
NCBI Official Symbol	RNF130
NCBI Official Synonym Symbols	GP; G1RZFP; GOLIATH
NCBI Protein Information	E3 ubiquitin-protein ligase RNF130
UniProt Protein Name	E3 ubiquitin-protein ligase RNF130
UniProt Gene Name	RNF130
UniProt Synonym Gene Names	H-Goliath

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
