

PTPN6 (SHP1) Recombinant Protein | PTPN6 recombinant protein

PTPN6 (SHP1), Active

CATALOG # AAA73821	HOST E Coli	APPLICATIONS Western Blot
------------------------------	-----------------------	-------------------------------------

PRODUCT SYNONYMS

PTPN6 (SHP1); Active; SHP1; SHP-1; HCP; HCPH; HPTP1C; PTP-1C; SHP-1L; SH-PTP1; PTPN6 recombinant protein

PRODUCT SPECIFICATIONS

Host	E Coli
Form/Format	Recombinant protein stored in 20mM MOPS, pH7.5, 300mM NaCl, 100mM imidazole, 0.1mM PMSF, 0.25mM DTT, 25% glycerol.
Applicable Applications for PTPN6 recombinant protein	WB (Western Blot), Phosphatase Assay
Tag	HIS
Species	Human
Dry Ice Note	The product may be shipped with dry ice, and an additional fee may be added to your shipping cost.
Preparation and Storage	Store product at -70 degree C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.

Activity

Specific Activity: Sample Kinase Activity Plot. For specific information on a given lot, see related technical data sheet.

ADDITIONAL INFORMATION

Related Product Information for PTPN6 recombinant protein	Recombinant full length human PTPN6 was expressed in E Coli cells using a C-terminal His tag. The gene accession number is NM_0080548. PTPN6 gene is preferentially expressed in a variety of hematopoietic cells, and is an early response gene in lymphokine stimulated cells (1). The noncatalytic N-terminus of this PTP can interact with MAP kinases and negatively regulates ERK2 and p38 MAP-kinases activity (2). The PTPN6 was shown to be involved in the regulation of T cell antigen receptor (TCR) signaling, which was thought to function through dephosphorylating the molecules related to MAP kinase pathway.
Product Categories/Family for PTPN6 recombinant protein	Phosphatases; Cancer; Inflammation; Invasion/Metastasis; JAK/STAT Pathway; Metabolic Disorder; Phosphatases; WNT Signaling
