

RNF34L (CARP2) Recombinant Protein | RNF34L recombinant protein

RNF34L (CARP2), Active

CATALOG # AAA73945	HOST Sf9 insect cells	APPLICATIONS Western Blot
------------------------------	---------------------------------	-------------------------------------

PRODUCT SYNONYMS

RNF34L (CARP2); Active; FRING; CARP2; CARP-2; RNF189; RNF34L; RIFIFYLIN; RNF34L recombinant protein

PRODUCT SPECIFICATIONS

Host	Sf9 insect cells
Form/Format	Recombinant proteins stored in 50mM Tris-HCl, pH7.5, 150mM NaCl, 10mM glutathione, 0.1mM EDTA, 0.25mM DTT, 0.1mM PMSF, 25% glycerol.
Applicable Applications for RNF34L recombinant protein	WB (Western Blot)
Tag	GST
Species	Human
Dry Ice Note	The product may be shipped with dry ice, and an additional fee may be added to your shipping cost.
Preparation and Storage	Store product at -70 degree C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for RNF34L recombinant protein	Recombinant full-length human RNF34L was expressed by baculovirus in Sf9 insect cells using an N-terminal GST tag. The RNF34L gene accession number is NM_001017368. E3 ubiquitin-protein ligase RNF34L, also named CARP2 (Caspases-8/10 Associated RING protein 2), acts as RING?domain E3 ligases, ubiquitinates apical caspases and targets them for proteasome-mediated degradation. CARP gene silencing inhibits tumor cell survival and increases cancer cell sensitivity to the death ligand or chemotherapy-induced apoptosis. CARP proteins target the tumor suppressor p53 for degradation. RNF34L also acts at the level of endocytic vesicles to limit the intensity of TNF-induced NF-kappaB activation by the regulated elimination of the adaptor protein RIP1.
Product Categories/Family for RNF34L recombinant protein	Ubiquitin Enzymes ; Apoptosis/Autophagy ; Cancer ; Metabolic Disorder ; Neurobiology
