

Tau-441, PHKG2-phosphorylated Recombinant Protein | Tau-441 recombinant protein

Tau-441, PHKG2-phosphorylated

CATALOG # AAA74010	HOST E Coli	APPLICATIONS Western Blot
------------------------------	-----------------------	-------------------------------------

PRODUCT SYNONYMS

Tau-441; PHKG2-phosphorylated; Tau-F; (N2R4); Tau-4; MAPT; MSTD; PPND; DDPAC; MAPTL; MTBT1; MTBT2; FTDP-17; FLJ31424; MGC138549; Tau-441 recombinant protein

PRODUCT SPECIFICATIONS

Host	E Coli
Form/Format	Recombinant protein stored in 50mM Tris-HCl, pH7.5, 150mM NaCl, 0.25mM DTT, 0.1mM PMSF, 25% glycerol.
Applicable Applications for Tau-441 recombinant protein	WB (Western Blot), Kinase Assay
Tag	TAG-Free
Species	Human
Dry Ice Note	The product may be shipped with dry ice, and an additional fee may be added to your shipping cost.
Preparation and Storage	Store product at -70 degree C. For optimal storage, aliquot target into smaller quantities after centrifugation and store at recommended temperature. For most favorable performance, avoid repeated handling and multiple freeze/thaw cycles.

ADDITIONAL INFORMATION

Related Product Information for Tau-441 recombinant protein	Recombinant human tag-free Tau-441 was co-expressed with PHKG2 in E Coli cells. The Tau-441 protein was phosphorylated by PHKG2 in vivo and in vitro prior to the final chromatography purification. The protein accession number is P10636-8. Tau-441 or Tau-F is a member of the Tau family of proteins which function to stabilize the microtubules by binding to them. Tau proteins are subject to phosphorylation and this phenomenon regulates the association of the Tau protein with the microtubules (1). Deposits of Alzheimer's disease AD-associated proteins, such as hyperphosphorylated Tau, as well as other shared misfolded proteins, such as, beta-amyloid precursor protein (betaAPP), ubiquitin, and various chaperones and protein kinases are thought to play a pathologic role in the cognitive decline and muscular failure. Malfunctioning of Tau proteins is associated with microtubules disintegration and collapsing of the neuronal transport system (2).
