ADDITIONAL INFORMATION

Related Product Information for anti-H-2Kd (private; H-2.m31) antibody	Purified Anti-Mouse H-2K d Monoclonal Antibody is specific for cells expressing the H-2K antigen coded for by the d haplotype. The reaction pattern of this antibody with a panel of inbred and recombinant haplotypes demonstrates that the antibody detects a private determinant (H-2.31) of the H-2K d antigen. This antibody can be used to quantitate or eliminate cells bearing the H-2K d (H-2.31) antigen from the appropriate strains of mice.
