

Rabbit anti Human IgA (Texas Red) Secondary Antibody | IgA secondary antibody

Rabbit anti Human IgA (Texas Red)

CATALOG # AAA75497	HOST Rabbit	APPLICATIONS Immunofluorescence, Flow Cytometry, Functional Assay, ELISA
------------------------------	-----------------------	--

PRODUCT SYNONYMS

Rabbit anti Human IgA (Texas Red); Rabbit anti Human Immunoglobulin A secondary; IgA secondary antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Specificity	Human IgA
Purity/Purification	Rabbit anti Human IgA was purified by affinity chromatography.
Form/Format	Lyophilized from 0.02M Potassium Phosphate, 0.15M Sodium Chloride, pH7.2 , with 10mg/mL BSA (Immunoglobulin and Protease free), with 0.01% Sodium Azide as preservative. Restore with 1.0ml deionized water or equivalent.
Concentration	1.0 mg, Lyophilized (varies by lot)
Applicable Applications for IgA secondary antibody	IF (Immunofluorescence), FCM/FACS (Flow Cytometry), ELISA
Cross-Reactivity	Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum, Human IgA and Human Serum
Biohazard Information	This product contains sodium azide as preservative. Although the amount of sodium azide is very small appropriate care must be taken when handling this product.
Tag/Conjugate	Texas Red
Immunogen	Rabbit anti-human IgA was raised in rabbit using human IgA heavy chain as the immunogen.
Preparation and Storage	Store at 4°C prior to restoration . For extended storage aliquot and freeze at -20°C or below. Avoid freeze/thaw cycles. Centrifuge if not completely clear after standing at room temperture. Product is stable for several weeks at 4°C as an undiluted liquid. Dilute only prior to immediate use.

ADDITIONAL INFORMATION

Related Product Information for IgA secondary antibody	Rabbit anti Human IgA secondary antibody
Product Categories/Family for IgA secondary antibody	Immunology ; Conjugated Secondary Antibodies

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
