

Macrophage Scavenger Receptor I/CD204 Blocking Peptide | CD204 blocking peptide

Macrophage Scavenger Receptor I/CD204

CATALOG #
AAA76660

PRODUCT SYNONYMS

Macrophage Scavenger Receptor I/CD204; CD204 blocking peptide

PRODUCT SPECIFICATIONS

Preparation and Storage

Store at 4 degree C short term. Store at -20 degree C for maximum stability. Avoid freeze-thaw cycles.

Related Product Information for CD204 blocking peptide

Macrophage Scavenger Receptor I/CD204 Blocking Peptide; specific to RA25074

Macrophage scavenger receptors (MSR) are membrane glycoproteins that mediate the recognition and uptake of a variety of macromolecules, including modified lipoproteins, advanced glycation end (AGEs) products and amyloid b-protein (Abeta). While the normal role of MSR is associated with cell adhesion and host defense mechanisms, it also has been implicated in the development of atherosclerosis and Abeta deposition in Alzheimer's disease (AD).

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
