

Mouse anti-Human CRP Monoclonal Antibody | anti-CRP antibody

anti-Human CRP

CATALOG # AAA76809	HOST Mouse	REACTIVITY Human
------------------------------	----------------------	----------------------------

PRODUCT SYNONYMS

CRP; Monoclonal Antibody; anti-Human CRP; Purified Mouse anti-Human CRP; Antibodies to Human CRP; anti-CRP antibody

PRODUCT SPECIFICATIONS

Host	Mouse
Reactivity	Human
Clonality	Monoclonal
Form/Format	Lyophilized
Buffer	PBS buffer with non-protein stabilizer
Procedure	This mouse IgG1 kappa antibody is purified from tissue culture media using salt fractionation procedures and Protein A chromatography.
Specifications	When testes by immunoelectrophoresis as an antigen concentration of 3.0 mg/ml, the pattern precipitation against goat-anti mouse whole serum is the same as that against goat anti-mouse IgG Fc fragment specific. By indirect ELISA and Western Blot this antibody reacts with human CRP. Optimal working dilutions should be determined for the particular assay conditions.
Preparation and Storage	Lyophilized material should be kept at 4°C until rehydrated and will remain stable for a minimum of 2 years. Rehydrate by adding 1.0 mL of reagent quality water with preservative to the product vial. Store the liquid solution at 4°C for up to a week; thereafter, aliquots should be prepared and stored frozen. Stable for a minimum of 1 year at -20°C but multiple freeze-thaw cycles should be avoided.

ADDITIONAL INFORMATION

Product Categories/Family for anti-CRP antibody	Human Protein; Antibodies TO HUMAN PROTEINS
---	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
