

Human LRG1 ELISA Kit | LRG1 elisa kit

Human LRG1 ELISA Kit

CATALOG #
AAA76960

REACTIVITY
Human

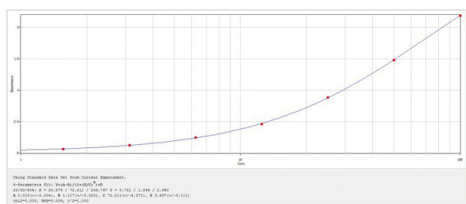

PRODUCT SYNONYMS

LRG1; Human LRG1 ELISA Kit; LRG1 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Sequence Length	347
Samples	Human samples
Assay Type	Sandwich
Preparation and Storage	Store at 4 degree C.

Intended Uses: The LRG1 test kit is a highly sensitive two-site enzyme linked immunoassay (ELISA) for measuring LRG1 in human biological samples. If the ELISA is to be used outside the intended use, the user may need to optimize for said use.

Principle of the Assay: The principle of the double antibody sandwich ELISA is represented in Figure 1. In this assay the LRG1 present in samples reacts with the anti-LRG1 antibodies, which have been adsorbed to the surface of polystyrene microtitre wells. After the removal of unbound proteins by washing, anti-LRG1 antibodies conjugated with horseradish peroxidase (HRP) are added. These enzyme-labeled antibodies form complexes with the previously bound LRG1. Following another washing step, the enzyme bound to the immunosorbent is assayed by the addition of a chromogenic substrate, 3,3',5,5'-tetramethylbenzidine (TMB). The quantity of bound enzyme varies directly with the concentration of LRG1 in the sample tested; thus, the absorbance, at 450 nm, is a measure of the concentration of LRG1 in the test sample. The quantity of LRG1 in the test sample can be interpolated from the standard curve constructed from the standards, and corrected for sample dilution.
