

Rabbit anti Monkey IgG Fab Secondary Antibody

Rabbit anti Monkey IgG Fab

CATALOG # AAA77545	HOST Rabbit	REACTIVITY Monkey
------------------------------	-----------------------	-----------------------------

PRODUCT SYNONYMS

Rabbit anti Monkey IgG Fab; Polyclonal Secondary Antibody; Rabbit anti Monkey IgG Fab secondary antibody

PRODUCT SPECIFICATIONS

Host	Rabbit
Reactivity	Monkey
Clonality	Polyclonal
Specificity	Precipitating polyclonal Rabbit antiSerum to Monkey Fab of IgG
Source	Purified Fab of normal Rhesus monkey IgG. Freund's complete adjuvant is used in the first step of the immunization procedure.
Reactivity Note	Inter-species cross-reactivity is a normal feature of antibodies to immunoglobulins, since Ig of different species frequently share antigenic determinants. Cross-reactivity of this antiSerum has not been tested in detail, however in immunoelectrophoresis a reaction with Human has been observed.
Product	Delipidated, heat inactivated lyophilized stable whole serum No preservative added, as it may interfere with the antibody activity. No foreign protein added. Total protein and IgG concentration in the antiserum are comparable to those of pooled rabbit serum. No foreign proteins added. It is reconstituted by adding 1 ml sterile distilled water.
Preparation and Storage	The lyophilized antiserum is shipped at ambient temperature and may be stored at +4°C; prolonged storage at or below -20°C. Working dilutions are prepared by adding sterile phosphate buffered saline (PBS, pH 7.2). Repeated thawing and freezing should be avoided. Working dilutions should be stored at +4°C, not refrozen, and preferably used the same day. If a slight precipitation occurs upon storage, this should be removed by centrifugation. It will not affect the performance of the product.

ADDITIONAL INFORMATION

Related Product Information for Rabbit anti Monkey IgG Fab secondary antibody	The antiserum is reacting with the Fab subunit of intact IgG, IgA and IgM and other Ig classes of both light chain types, with their Fab or F(ab') ₂ subunits and with free light chains of kappa and lambda type as tested in immunoelectrophoresis and double radial immunodiffusion. In immunoelectrophoresis and double radial immunodiffusion to identify the presence of Fab, free or bound.
Product Categories/Family for Rabbit anti Monkey IgG Fab secondary antibody	Antisera

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
