

CD134 protein

CD134(OX40)-mulg-Purified (with Antibiotics)

CATALOG # AAA78189	HOST CHO cells	REACTIVITY Human	APPLICATIONS ELISA, Flow Cytometry, Functional Assay
------------------------------	--------------------------	----------------------------	--

PRODUCT SYNONYMS

CD134; CD134(OX40)-mulg-Purified (with Antibiotics); Human CD134(OX40)-mulg Fusion Protein; CD134 protein

PRODUCT SPECIFICATIONS

Host	CHO cells
Reactivity	Human
Purity/Purification	Purified (with Antibiotics)
Form/Format	50 mM Sodium Phosphate pH 7.5, 100 mM Potassium Chloride, 150mM NaCl, 0.5% Gentamicin sulfate
Concentration	0.5 mg/ml (varies by lot)
Sequence Length	277
Applicable Applications for CD134 protein	ELISA, FCM/FACS (Flow Cytometry)
Molecular Structure	A soluble molecule consisting of the extracellular (177 aa) domain of human CD134 fused to the murine IgG2a hinge + Fc (233 aa). Predicted monomeric non glycosylated weight is 45.6 kd. Fusion construct is dimeric and runs at about 105 kd in non reduced SDS-PAGE.
Transfectant Cell Line	CHO
Performance	Indirect binding: CD134-mulg fusion protein bound to cell surface CD252 on HUVEC dected with GAM/FITC. Cells stained positive with a mean shift of 0.62 log10 fluorescent units. Blocking counter ligand: Pre incubation of recombinant soluble CD252(OX40L)-muCD8 with a 10-fold excess of CD134-mulg blocked binding to human HPB-MLT cells dectected by anti-murine CD8/PE.
Production	Fusion protein from (low FBS containing) tissue culture supernatant of transfectants was purified using size exclusion chromatography.
Buffer	50 mM Sodium Phosphate pH 7.6, 100mM NaCl, 0.5 mg/ml Gentamicin Sulfate (as a preservative).
Group Header	CD134(OX40)-mulg
Preparation and Storage	Store at 2 - 5 degree C. Freeze/Thawing is not recommended. Product should retain activity for at least 12 months after shipping date when stored as recommended.

ADDITIONAL INFORMATION

Related Product Information for CD134 protein	Information: Human CD134 (OX40) (ACT35) is an activation-associated antigen which is predominantly expressed on activated CD4 positive cells. CD134 antigen is a member of the tumor necrosis factor (TNF) receptor family of molecules and may be involved with regulating T cell-dependent B cell proliferation and differentiation (2). The CD134 costimulatory pathway seems to be more effective for costimulation of CD4+ helper T cells than for CD8+ effector T cells (5). Blockade of this interaction in mouse abrogated immunological effects in several models of inflammation and rejection (6,7,8,9). CD134-muIg fusion protein binds to CD134L on Human Umbilical Cord Endothelial Cells (HUVEC).

NCBI AND UNIPROT INFORMATION

NCBI GI #	8926702
NCBI GeneID	7293
UniProt Accession #	P43489; Q13663; Q2M312; Q5T7M0
Molecular Weight	29,341 Da
NCBI Official Full Name	CD134 antigen
NCBI Official Synonym Full Names	tumor necrosis factor receptor superfamily, member 4
NCBI Official Symbol	TNFRSF4
NCBI Official Synonym Symbols	OX40; ACT35; CD134; IMD16; TXGP1L
NCBI Protein Information	tumor necrosis factor receptor superfamily member 4; OX40 antigen; ACT35 antigen; ATC35 antigen; CD134 antigen; OX40 homologue; OX40L receptor; OX40 cell surface antigen; lymphoid activation antigen ACT35; TAX transcriptionally-activated glycoprotein 1 receptor; tax-transcriptionally activated glycoprotein 1 receptor
UniProt Protein Name	Tumor necrosis factor receptor superfamily member 4
UniProt Gene Name	TNFRSF4
UniProt Synonym Gene Names	TXGP1L
UniProt Entry Name	TNR4_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
