ADDITIONAL INFORMATION

Related Product Information for IL-7 elisa kit	IL-7 is a hematopoietic growth factor that primarily affects early B and T cells. Produced by thymic stromal cells, spleen cells and keratinocytes, IL-7 can also co-stimulate the proliferation of mature T cells in combination with other factors, such as ConA and IL-2. Human IL-7 Pre-Coated ELISA (Enzyme-Linked Immunosorbent Assay) kit is a solid phase immunoassay specially designed to measure IL-7 with a 96-well strip plate that is pre-coated with mouse monoclonal antibody specific for IL-7. It contains E Coli-expressed recombinant IL-7. The detection antibody is a biotinylated goat polyclonal antibody specific for IL-7. The kit is analytically validated with ready to use reagents.
