

Human acylation stimulating protein (ASP) ELISA Kit | ASP elisa kit

Human acylation stimulating protein, ASP ELISA Kit

CATALOG #
AAA79630

REACTIVITY
Human

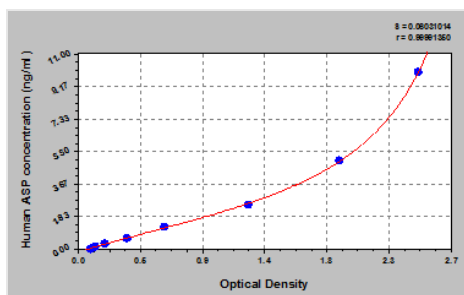

PRODUCT SYNONYMS

acylation stimulating protein (ASP); Human acylation stimulating protein; ASP ELISA Kit; Human acylation stimulating protein (ASP) ELISA Kit; ASP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, tissue homogenates
Assay Type	Sandwich
Detection Range	0.156 ng/ml-10 ng/ml
Sensitivity	0.039 ng/ml
Detection Wavelength	450 nm
Sample Volume	50-100ul
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

Related Product Information for ASP elisa kit

Principle of the Assay: This assay employs the quantitative sandwich enzyme immunoassay technique. Antibody specific for ASP has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any ASP present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for ASP is added to the wells. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of ASP bound in the initial step. The color development is stopped and the intensity of the color is measured.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
