

## Human thymidine phosphorylase ELISA Kit | TYMP elisa kit

Human thymidinephosphorylase, TP ELISA Kit

CATALOG #  
**AAA79673**

REACTIVITY  
**Human**

### PRODUCT SYNONYMS

thymidine phosphorylase; Human thymidinephosphorylase; TP ELISA Kit; ECGF1; MNGIE; PDECGF; TP; hPD-ECGF; OTTHUMP00000196769; endothelial cell growth factor 1 (platelet-derived) ; gliostatin; TYMP elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                   |
|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                             |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of human TP. No significant cross-reactivity or interference between human TP and analogues was observed. |
| Sequence Length         | 482                                                                                                                                                                               |
| Samples                 | Serum, plasma, tissue homogenates                                                                                                                                                 |
| Assay Type              | Quantitative Sandwich                                                                                                                                                             |
| Detection Range         | 62.5 ng/ml-4000 ng/ml                                                                                                                                                             |
| Sensitivity             | < 15.6 ng/ml                                                                                                                                                                      |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess.                                  |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): CV%<10%. Three samples of known concentration were tested in twenty assays to assess.                                           |
| Preparation and Storage | Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.                                                 |

| Related Product Information for TYMP elisa kit | Principle of the Assay: This assay employs the quantitative sandwich enzyme immunoassay technique. Antibody specific for TP has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any TP present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for TP is added to the wells. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of TP bound in the initial step. The color development is stopped and the intensity of the color is measured. |
