

Human Activin A, ACV-A ELISA Kit | ACV-A elisa kit

Human Activin A, ACV-A ELISA Kit

CATALOG #
AAA80370

REACTIVITY
Human

PRODUCT SYNONYMS

Activin A; ACV-A; Human Activin A; ACV-A ELISA Kit; ACV-A elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, tissue homogenates
Detection Range	53 pg/ml-2000 pg/ml
Sensitivity	13 pg/ml
Detection Wavelength	450 nm
Sample Volume	50-100ul
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

ADDITIONAL INFORMATION

Related Product Information for ACV-A elisa kit

Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to ACV-A. Standards or samples are then added to the appropriate microtiter plate wells with a Horseradish Peroxidase (HRP)-conjugated monoclonal antibody preparation specific for ACV-A and incubated. Then substrate solution A and B are added to each well. Only those wells that contain ACV-A, HRP-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The concentration of ACV-A in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
