

## Human Complement fragment 3a, C3a ELISA Kit | C3a elisa kit

Human Complement fragment 3a, C3a ELISA Kit

CATALOG #  
**AAA80449**

REACTIVITY  
**Human**

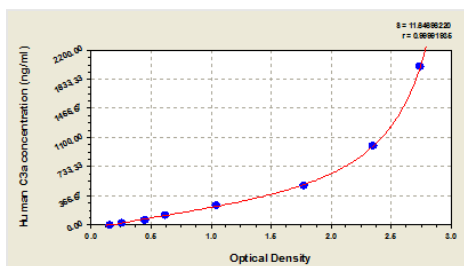

### PRODUCT SYNONYMS

Complement fragment 3a; C3a; Human Complement fragment 3a; C3a ELISA Kit; C3a elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                     |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Human                                                                                                                                                                               |
| Specificity             | This assay has high sensitivity and excellent specificity for detection of human C3a. No significant cross-reactivity or interference between human C3a and analogues was observed. |
| Samples                 | Serum, plasma, tissue homogenates.                                                                                                                                                  |
| Assay Type              | Sandwich (Quantitative)                                                                                                                                                             |
| Detection Range         | 31.25 ng/ml-2000 ng/ml.                                                                                                                                                             |
| Sensitivity             | 7.81 ng/ml.                                                                                                                                                                         |
| Intra-assay Precision   | Intra-assay Precision (Precision within an assay): CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess.                                    |
| Inter-assay Precision   | Inter-assay Precision (Precision between assays): CV%<10%. Three samples of known concentration were tested in twenty assays to assess.                                             |
| Preparation and Storage | Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.                                                   |

### ADDITIONAL INFORMATION

#### Related Product Information for C3a elisa kit

**Principle of the Assay:** This assay employs the quantitative sandwich enzyme immunoassay technique. Antibody specific for C3a has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any C3a present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for C3a is added to the wells. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of C3a bound in the initial step. The color development is stopped and the intensity of the color is measured.

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
