

Rat Melatonin (MT) ELISA Kit | MT elisa kit

Rat Melatonin, MT ELISA Kit

CATALOG #
AAA80515

REACTIVITY
Rat

PRODUCT SYNONYMS

Melatonin (MT); Rat Melatonin; MT ELISA Kit; Rat Melatonin (MT) ELISA Kit; MT elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of rat MT. No significant cross-reactivity or interference between rat MT and analogues was observed.
Samples	Serum, plasma
Assay Type	Quantitative Competitive
Detection Range	12.5 pg/ml-500 pg/ml
Sensitivity	< 12.5 pg/ml
Intra-assay Precision	Intra-assay Precision (Precision within an assay): CV%<15%. Three samples of known concentration were tested twenty times on one plate to assess.
Inter-assay Precision	Inter-assay Precision (Precision between assays): CV%<15%. Three samples of known concentration were tested in twenty assays to assess.
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

ADDITIONAL INFORMATION

Related Product Information for MT elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with goat-anti-rabbit antibody. Standards or samples are added to the appropriate microtiter plate wells with an antibody specific for MT and Horseradish Peroxidase (HRP) conjugated MT. The competitive inhibition reaction is launched between with HRP labeled MT and unlabeled MT with the antibody. A substrate solution is added to the wells and the color develops in opposite to the amount of MT in the sample. The color development is stopped and the intensity of the color is measured.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
