

Rat Collagen Type I , Col I ELISA Kit | Col I elisa kit

Rat Collagen Type I , Col I ELISA Kit

CATALOG #
AAA80672

REACTIVITY
Rat

PRODUCT SYNONYMS

Collagen Type I; Col I; Rat Collagen Type I; Col I ELISA Kit; Col I elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, tissue homogenates
Assay Type	Sandwich
Detection Range	78 pg/ml-5000 pg/ml
Sensitivity	19.5 pg/ml
Detection Wavelength	450 nm
Sample Volume	50-100ul
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

ADDITIONAL INFORMATION

Related Product Information for Col I elisa kit

Principle of the Assay: This assay employs the quantitative sandwich enzyme immunoassay technique. Antibody specific for Col I has been pre-coated onto a microplate. Standards and samples are pipetted into the wells and any Col I present is bound by the immobilized antibody. After removing any unbound substances, a biotin-conjugated antibody specific for Col I is added to the wells. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Following a wash to remove any unbound avidin-enzyme reagent, a substrate solution is added to the wells and color develops in proportion to the amount of Col I bound in the initial step. The color development is stopped and the intensity of the color is measured.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
