

Rat Folic acid, FA ELISA Kit | FA elisa kit

Rat Folic acid, FA ELISA Kit

CATALOG #
AAA80734

REACTIVITY
Rat

PRODUCT SYNONYMS

Folic acid; FA; Rat Folic acid; FA ELISA Kit; FA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of rat folic acid. No significant cross-reactivity or interference between rat folic acid and analogues was observed.
Samples	Serum, plasma.
Assay Type	Competitive
Detection Range	19.5 pg/ml-5000 pg/ml.
Sensitivity	19.5 pg/ml.
Intra-assay Precision	Intra-assay Precision (Precision within an assay): CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess.
Inter-assay Precision	Inter-assay Precision (Precision between assays): CV%<10%. Three samples of known concentration were tested in twenty assays to assess.
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

ADDITIONAL INFORMATION

Related Product Information for FA elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with an antigen. Standards or samples are added to the appropriate microtiter plate wells with antibody specific for folic acid and Horseradish Peroxidase (HRP) conjugated goat-anti-rabbit antibody. The competitive inhibition reaction is launched between with pre-coated folic acid and folic acid in samples. A substrate solution is added to the wells and the color develops in opposite to the amount of folic acid in the sample. The color development is stopped and the intensity of the color is measured.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
