

Mouse procollagen type III (HPCIII) ELISA Kit | HPCIII elisa kit

Mouse procollagen type III, HPCIII ELISA Kit

CATALOG #
AAA80882

REACTIVITY
Mouse

PRODUCT SYNONYMS

procollagen type III (HPCIII); Mouse procollagen type III; HPCIII ELISA Kit; Mouse procollagen type III (HPCIII) ELISA Kit; HPCIII elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, cell culture supernates, tissue homogenates
Detection Range	15.6 pg/ml-1000 pg/ml
Sensitivity	3.9 pg/ml
Detection Wavelength	450 nm
Sample Volume	50-100ul
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

ADDITIONAL INFORMATION

Related Product Information for HPCIII elisa kit

Principle of the Assay: The microtiter plate provided in this kit has been pre-coated with an antibody specific to HPCIII. Standards or samples are then added to the appropriate microtiter plate wells with a biotin-conjugated antibody preparation specific for HPCIII and Avidin conjugated to Horseradish Peroxidase (HRP) is added to each microplate well and incubated. Then a TMB (3,3',5,5' tetramethyl-benzidine) substrate solution is added to each well. Only those wells that contain HPCIII, biotin-conjugated antibody and enzyme-conjugated Avidin will exhibit a change in color. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm +/- 2 nm. The concentration of HPCIII in the samples is then determined by comparing the O.D. of the samples to the standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
