

Human Folic acid (FA) ELISA Kit | FA elisa kit

Human Folic acid, FA ELISA Kit

CATALOG #
AAA80909

REACTIVITY
Human

PRODUCT SYNONYMS

Folic acid (FA); Human Folic acid; FA ELISA Kit; Human Folic acid (FA) ELISA Kit; Human Folic acid (FA); FA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of human FA. No significant cross-reactivity or interference between human FA and analogues was observed.
Assay Type	Competitive
Samples	Serum, plasma
Detection Range	12.5 pg/ml-200 pg/ml
Sensitivity	< 6.25 pg/ml
Intra-assay Precision	Intra-assay Precision (Precision within an assay): CV%<8%. Three samples of known concentration were tested twenty times on one plate to assess.
Inter-assay Precision	Inter-assay Precision (Precision between assays): CV%<10%. Three samples of known concentration were tested in twenty assays to assess.
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

ADDITIONAL INFORMATION

Related Product Information for FA elisa kit

Principle of the Assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with an antibody specific to FA. Standards or samples are added to the appropriate microtiter plate wells with Horseradish Peroxidase (HRP) conjugated FA. The competitive inhibition reaction is launched between with HRP-conjugated FA and FA in samples. A substrate solution is added to the wells and the color develops in opposite to the amount of FA in the sample. The color development is stopped and the intensity of the color is measured.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
