

Monkey tri-iodothyronine (T3) ELISA Kit | T3 elisa kit

Monkey tri-iodothyronine, T3 ELISA Kit

CATALOG #
AAA80955

REACTIVITY
Monkey

PRODUCT SYNONYMS

tri-iodothyronine (T3); Monkey tri-iodothyronine; T3 ELISA Kit; Monkey tri-iodothyronine (T3) ELISA kit; Monkey tri-iodothyronine (T3); T3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Monkey
Specificity	This assay has high sensitivity and excellent specificity for detection of monkey T3. No significant cross-reactivity or interference between monkey T3 and analogues was observed.
Samples	Serum, plasma, tissue homogenates
Assay Type	Competitive
Detection Range	0.5 ng/ml-8 ng/ml.
Sensitivity	The minimum detectable dose of monkey T3 is typically less than 0.25 ng/ml. The sensitivity of this assay, or Lower Limit of Detection (LLD) was defined as the lowest monkey T3 concentration that could be differentiated from zero. It was determined the mean O.D value of 20 replicates of the zero standard added by their three standard deviations.
Intra-assay Precision	Intra-assay Precision (Precision within an assay): CV%<15%. Three samples of known concentration were tested twenty times on one plate to assess.
Inter-assay	Inter-assay Precision (Precision between assays): CV%<15%. Three samples of known concentration were tested in twenty assays to assess.
Preparation and Storage	Unopened test kits should be stored at 2 to 8 degree C upon receipt. Please refer to pdf manual for further storage instructions.

ADDITIONAL INFORMATION

Related Product Information for T3 elisa kit	Principle of the assay: This assay employs the competitive inhibition enzyme immunoassay technique. The microtiter plate provided in this kit has been pre-coated with an antibody specific to T3. Standards or samples are added to the appropriate microtiter plate wells with Biotin-conjugated T3. A competitive inhibition reaction is launched between T3 (Standards or samples) and Biotin-conjugated T3 with the pre-coated antibody specific for T3. The more amount of T3 in samples, the less antibody bound by Biotin-conjugated T3. After washing, avidin conjugated Horseradish Peroxidase (HRP) is added to the wells. Substrate solution is added to the wells and the color develops in opposite to the amount of T3 in the sample. The color development is stopped and the intensity of the color is measured.
