

Human Basic fibroblast growth factor 9 ELISA Kit | bFGF 9 elisa kit

Human Basic fibroblast growth factor 9 ELISA Kit

CATALOG #
AAA81863

REACTIVITY
Human

PRODUCT SYNONYMS

Basic fibroblast growth factor 9; Human Basic fibroblast growth factor 9 ELISA Kit; bFGF 9 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	50-1000pg/mL
Sensitivity	1.0pg/mL
Intended Uses	This bFGF9 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human bFGF9. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for bFGF 9 elisa kit

Principle of the assay: bFGF9 ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-bFGF9 antibody and an bFGF9-HRP conjugate. The assay sample and buffer are incubated together with bFGF9-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the bFGF9 concentration since bFGF9 from samples and bFGF9-HRP conjugate compete for the anti-bFGF9 antibody binding site. Since the number of sites is limited, as more sites are occupied by bFGF9 from the sample, fewer sites are left to bind bFGF9-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The bFGF9 concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
