

## Mouse Acylation Stimulating Protein ELISA Kit | ASP elisa kit

Mouse Acylation Stimulating Protein ELISA Kit

|                              |                            |
|------------------------------|----------------------------|
| CATALOG #<br><b>AAA82080</b> | REACTIVITY<br><b>Mouse</b> |
|------------------------------|----------------------------|

### PRODUCT SYNONYMS

Acylation Stimulating Protein; Mouse Acylation Stimulating Protein ELISA Kit; ASP elisa kit

### PRODUCT SPECIFICATIONS

|                            |                                                                            |
|----------------------------|----------------------------------------------------------------------------|
| Reactivity                 | Mouse                                                                      |
| Samples                    | Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate |
| Assay Type                 | Competitive                                                                |
| Detection Range            | 10-250ng/mL                                                                |
| Sensitivity                | 1.0ng/mL                                                                   |
| Highest Standards          | 250ng/mL                                                                   |
| Concentration of Standards | Concentration of Standards                                                 |
| Preparation and Storage    | Store all reagents at 2-8 degree C.                                        |

### ADDITIONAL INFORMATION

|                                             |            |
|---------------------------------------------|------------|
| Product Categories/Family for ASP elisa kit | Immunology |
|---------------------------------------------|------------|

### NCBI AND UNIPROT INFORMATION

|                           |             |
|---------------------------|-------------|
| NCBI GI #                 | 118600977   |
| NCBI GeneID               | 27151       |
| NCBI Accession #          | NP_056507.2 |
| NCBI GenBank Nucleotide # | NM_015692.2 |
| Molecular Weight          | 199,171 Da  |

|                                         |                                                                                                             |
|-----------------------------------------|-------------------------------------------------------------------------------------------------------------|
| <b>NCBI Official Full Name</b>          | C3 and PZP-like alpha-2-macroglobulin domain-containing protein 8                                           |
| <b>NCBI Official Synonym Full Names</b> | C3 and PZP-like, alpha-2-macroglobulin domain containing 8                                                  |
| <b>NCBI Official Symbol</b>             | CPAMD8                                                                                                      |
| <b>NCBI Official Synonym Symbols</b>    | VIP; K-CAP                                                                                                  |
| <b>NCBI Protein Information</b>         | C3 and PZP-like alpha-2-macroglobulin domain-containing protein 8; alpha-2 macroglobulin family protein VIP |
| <b>UniProt Protein Name</b>             | C3 and PZP-like alpha-2-macroglobulin domain-containing protein 8                                           |
| <b>UniProt Gene Name</b>                | <b>CPAMD8</b>                                                                                               |
| <b>UniProt Synonym Gene Names</b>       | KIAA1283                                                                                                    |
| <b>UniProt Entry Name</b>               | CPMD8_HUMAN                                                                                                 |

**For Research Use Only.** Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
