

## Rabbit High sensitivity C-Reactive Protein ELISA Kit | Hs-CRP elisa kit

Rabbit High sensitivity C-Reactive Protein ELISA Kit

CATALOG #  
**AAA82262**

REACTIVITY  
**Rabbit**

### PRODUCT SYNONYMS

High sensitivity C-Reactive Protein; Rabbit High sensitivity C-Reactive Protein ELISA Kit; High sensitivity C-Reactive Protein (Rabbit); Hs-CRP elisa kit

### PRODUCT SPECIFICATIONS

|                         |                                                                                                                                                                                             |
|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Reactivity              | Rabbit                                                                                                                                                                                      |
| Samples                 | Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate                                                                                                                  |
| Assay Type              | Competitive                                                                                                                                                                                 |
| Sensitivity             | 0.1 ng/mL.                                                                                                                                                                                  |
| Intended Uses           | This HS-CRP ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit HS-CRP. This ELISA kit for research use only, not for therapeutic applications! |
| Preparation and Storage | Store all reagents at 2-8 degree C                                                                                                                                                          |

### ADDITIONAL INFORMATION

#### Related Product Information for Hs-CRP elisa kit

**Principle of the assay:** HS-CRP ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-HS-CRP antibody and an HS-CRP-HRP conjugate. The assay sample and buffer are incubated together with HS-CRP-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the HS-CRP concentration since HS-CRP from samples and HS-CRP-HRP conjugate compete for the anti-HS-CRP antibody binding site. Since the number of sites is limited, as more sites are occupied by HS-CRP from the sample, fewer sites are left to bind HS-CRP-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The HS-CRP concentration in each sample is interpolated from this standard curve.

#### Product Categories/Family for Hs-CRP elisa kit
