

Rat Hepatocyte Nuclear Factor 1 Beta ELISA Kit | HNF1beta elisa kit

Rat Hepatocyte Nuclear Factor 1 Beta ELISA Kit

CATALOG #
AAA82366

REACTIVITY
Rat

PRODUCT SYNONYMS

Hepatocyte Nuclear Factor 1 Beta; Rat Hepatocyte Nuclear Factor 1 Beta ELISA Kit; HNF1beta elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	100-2500pg/mL
Sensitivity	1.0pg/ml
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for HNF1beta elisa kit	Intended Uses: This HNF1b ELISA kit is intended Laboratory for research use only. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration ofHNF1b in the sample, thisHNF1b ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versusHNF1b concentration. The concentration ofHNF1b in the samples is then determined by comparing the O.D. of the samples to the standard curve. Principle of the Assay: This HNF1b enzyme linked immunosorbent assay applies a technique called a quantitative sandwich immunoassay. The microtiter plate provided in this kit has been pre-coated with a monoclonal antibody specific forHNF1b. Standards or samples are then added to the microtiter plate wells andHNF1b if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount ofHNF1b present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific forHNF1b are added to each well to "sandwich" theHNF1b immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, A and B substrate solution is added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period.Only those wells that containHNF1b and enzyme-conjugated antibody will exhibit a change in colour. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the colour change is measured spectrophotometrically at a wavelength of 450 nm.

NCBI AND UNIPROT INFORMATION

NCBI GI #	260064065
NCBI GeneID	6928
NCBI Accession #	NP_001159395.1
NCBI GenBank Nucleotide #	NM_001165923.2
Molecular Weight	46,907 Da
NCBI Official Full Name	hepatocyte nuclear factor 1-beta isoform 2
NCBI Official Synonym Full Names	HNF1 homeobox B
NCBI Official Symbol	HNF1B
NCBI Official Synonym Symbols	FJHN; HNF2; LFB3; TCF2; HPC11; LF-B3; MODY5; TCF-2; VHNF1; HNF-1B; HNF1beta
NCBI Protein Information	hepatocyte nuclear factor 1-beta; HNF-1-beta; HNF1 beta A; homeoprotein LFB3; transcription factor 2, hepatic
UniProt Protein Name	Hepatocyte nuclear factor 1-beta
UniProt Gene Name	HNF1B
UniProt Synonym Gene Names	TCF2; HNF-1-beta; HNF-1B; TCF-2; vHNF1
UniProt Entry Name	HNF1B_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
