

Mouse Growth Regulated Oncogene Gamma ELISA Kit | GROg elisa kit

Mouse Growth Regulated Oncogene Gamma ELISA Kit

CATALOG #
AAA82398

REACTIVITY
Mouse

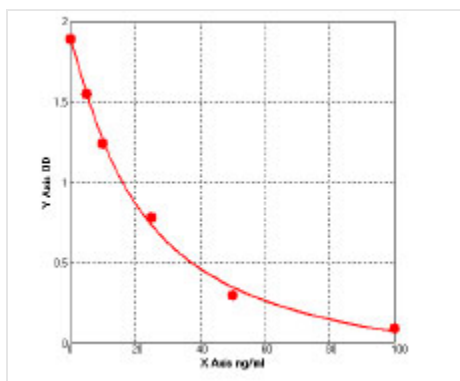

PRODUCT SYNONYMS

Growth Regulated Oncogene Gamma; Mouse Growth Regulated Oncogene Gamma ELISA Kit; GROg elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This FXalphaELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse FXalpha. This ELISA kit for research use only!

Principle of the Assay: FXalphaELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-FXalphaantibody and an FXalpha-HRP conjugate. The assay sample and buffer are incubated together with FXalpha-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the FXalphaconcentration since FXalphafrom samples and FXalpha-HRP conjugate compete for the anti-FXalphaantibody binding site. Since the number of sites is limited, as more sites are occupied by FXalphafrom the sample, fewer sites are left to bind FXalpha-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The FXalpha concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
