

Human Hetal hemoglobin ELISA Kit | HBF elisa kit

Human Hetal hemoglobin ELISA Kit

CATALOG #
AAA82717

REACTIVITY
Human

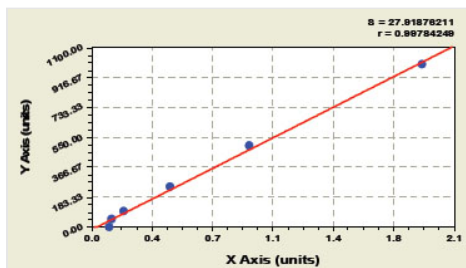

PRODUCT SYNONYMS

Hetal hemoglobin; Human Hetal hemoglobin ELISA Kit; HBF elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive or Sandwich
Detection Range	50-1000ng/mL
Sensitivity	1.0ng/mL
Intended Uses	This HBF ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human HBF. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for HBF elisa kit

Principle of the Assay: HBF ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for HBF. Standards or samples are then added to the microtiter plate wells and HBF if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of HBF present in the sample, a standardized preparation of horseradish peroxidase (HRP) -conjugated polyclonal antibody, specific for HBF are added to each well to "sandwich" the HBF immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain HBF and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The HBF concentration in each sample is interpolated from this standard curve.

Product Categories/Family for HBF elisa kit

Cardiovascular

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
