

Guinea Pig Choline phosphoglyceride ELISA Kit | PC/CPG elisa kit

Guinea pig Choline phosphoglyceride ELISA Kit

CATALOG #
AAA82725

REACTIVITY
Guinea Pig

PRODUCT SYNONYMS

Choline phosphoglyceride; Guinea pig Choline phosphoglyceride ELISA Kit; PC/CPG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Guinea Pig
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	1.0 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

PC/CPG elisa kit

For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate

INTENDED USE This PC/CPG ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Guinea pig PC/CPG. This ELISA kit for research use only!

PRINCIPLE OF THE ASSAY PC/CPG ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-PC/CPG antibody and an PC/CPG-HRP conjugate. The assay sample and buffer are incubated together with PC/CPG-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PC/CPG concentration since PC/CPG from samples and PC/CPG-HRP conjugate compete for the anti-PC/CPG antibody binding site. Since the number of sites is limited, as more sites are occupied by PC/CPG from the sample, fewer sites are left to bind PC/CPG-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PC/CPG concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
