

GuineaPig Serum albumin, HSA ELISA Kit | HSA elisa kit

Guinea Pig Serum albumin, HSA ELISA Kit

CATALOG #
AAA83053

REACTIVITY
GuineaPig

PRODUCT SYNONYMS

Serum albumin; HSA; Guinea Pig Serum albumin; HSA ELISA Kit; HSA ELISA Kit (Guinea Pig); HSA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	GuineaPig
Samples	Serum, Plasma, Cell Culture Supernatants, Body Fluid And Tissue Homogenate
Assay Type	Quantitative Competitive
Sensitivity	1.0 mg/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Related Product Information for HSA elisa kit

Intended Uses: This SA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse SA. This ELISA kit for research use only!

Principle of the Assay: SA ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-SA antibody and an SA-HRP conjugate. The assay sample and buffer are incubated together with SA-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the SA concentration since SA from samples and SA-HRP conjugate compete for the anti-SA antibody binding site. Since the number of sites is limited, as more sites are occupied by SA from the sample, fewer sites are left to bind SA-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SA concentration in each sample is interpolated from this standard curve.
