

Rat Phospho-Nuclear Factor kappa B ELISA Kit | pNFkB elisa kit

Rat Phospho-Nuclear Factor kappa B ELISA Kit

CATALOG #
AAA83059

REACTIVITY
Rat

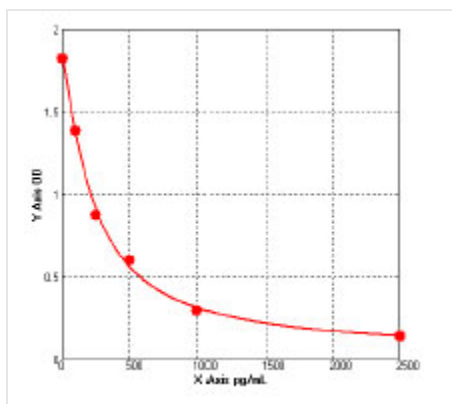

PRODUCT SYNONYMS

Phospho-Nuclear Factor kappa B; Rat Phospho-Nuclear Factor kappa B ELISA Kit; pNFkB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of PNFkappaB. No significant cross-reactivity or interference between PNFkappaB and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between PNFkappaB and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	1.0 pg/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for pNFkB elisa kit	Principle of the Assay: PNFkappaB ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-PNFkappaB antibody and an PNFkappaB-HRP conjugate. The assay sample and buffer are incubated together with PNFkappaB-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PNFkappaB concentration since PNFkappaB from samples and PNFkappaB-HRP conjugate compete for the anti-PNFkappaB antibody binding site. Since the number of sites is limited, as more sites are occupied by PNFkappaB from the sample, fewer sites are left to bind PNFkappaB-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PNFkappaB concentration in each sample is interpolated from this standard curve. Intended Uses: This PNFkappaB ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat PNFkappaB. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for pNFkB elisa kit	Cell Biology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
