

Human Intrinsic factor antibody ELISA Kit | IFA elisa kit

Human Intrinsic factor antibody ELISA Kit

CATALOG #
AAA83097

REACTIVITY
Human

PRODUCT SYNONYMS

Intrinsic factor antibody; Human Intrinsic factor antibody ELISA Kit; IFA elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Detection Range	2.5-50ug/mL
Sensitivity	1.0ug/mL
Intended Uses	This IFA ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human IFA. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for IFA elisa kit

Principle of the Assay: IFA ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for IFA. Standards or samples are then added to the microtiter plate wells and IFA if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of IFA present in the sample, a standardized preparation of horseradish peroxidase (HRP) -conjugated polyclonal antibody, specific for IFA are added to each well to "sandwich" the IFA immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain IFA and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The IFA concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	183186
Molecular Weight	42,698 Da
NCBI Official Full Name	intrinsic factor
UniProt Protein Name	Gastric intrinsic factor
UniProt Gene Name	GIF
UniProt Synonym Gene Names	IFMH; IF; INF
UniProt Entry Name	IF_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
