

Mouse a2 Microglobulin ELISA Kit | a2-MG elisa kit

Mouse a2 Microglobulin ELISA Kit

CATALOG #
AAA83119

REACTIVITY
Mouse

PRODUCT SYNONYMS

a2 Microglobulin; Mouse a2 Microglobulin ELISA Kit; a2-MG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Detection Range	0.5-10ng/mL
Sensitivity	0.1ng/mL
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses: This alpha2-MG ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse alpha2-MG.

Principle of the Assay: alpha2-MG ELISA kit applies the competitive enzyme immunoassay technique utilizing a Polyclonal anti-alpha2-MG antibody and an alpha2-MG-HRP conjugate. The assay sample and buffer are incubated together with alpha2-MG-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the alpha2-MG concentration since alpha2-MG from samples and alpha2-MG-HRP conjugate compete for the anti-alpha2-MG antibody binding site. Since the number of sites is limited, as more sites are occupied by alpha2-MG from the sample, fewer sites are left to bind alpha2-MG-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The alpha2-MG concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
