

Rat Spermine ELISA Kit | SM elisa kit

Rat Spermine ELISA Kit

CATALOG #
AAA83296

REACTIVITY
Rat

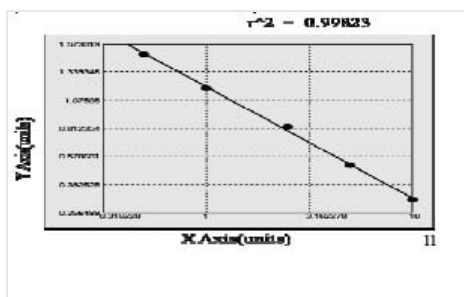

PRODUCT SYNONYMS

Spermine; Rat Spermine ELISA Kit; SM elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ug/ml
Intended Uses	This SM ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat SM. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for SM elisa kit

Principle of the Assay: SM ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-SM antibody and an SM-HRP conjugate. The assay sample and buffer are incubated together with SM-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the SM concentration since SM from samples and SM-HRP conjugate compete for the anti-SM antibody binding site. Since the number of sites is limited, as more sites are occupied by SM from the sample, fewer sites are left to bind SM-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The SM concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
