

Rat Galectin 2 (GAL2) ELISA Kit | GAL2 elisa kit

Rat Galectin 2 (GAL2) ELISA Kit

CATALOG #
AAA83506

REACTIVITY
Rat

PRODUCT SYNONYMS

Galectin 2 (GAL2); Rat Galectin 2 (GAL2) ELISA Kit; Rat Galectin 2 (GAL2); GAL2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for GAL2 elisa kit

For Samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate

Intended Uses: This GAL2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat GAL2. This ELISA kit for research use only!

Principle of the Assay: GAL2 ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for GAL2. Standards or samples are then added to the microtiter plate wells and GAL2 if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of GAL2 present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for GAL2 are added to each well to "sandwich" the GAL2 immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain GAL2 and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The GAL2 concentration in each sample is interpolated from this standard curve.
