

Human Cyclin D ELISA Kit | CD elisa kit

Human Cyclin D ELISA Kit

CATALOG #
AAA83537

REACTIVITY
Human

PRODUCT SYNONYMS

Cyclin D; Human Cyclin D ELISA Kit; CD elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of CyD. No significant cross-reactivity or interference between CyD and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between CyD and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/ml
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for CD elisa kit	Principle of the Assay: CyD ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-CyD antibody and an CyD-HRP conjugate. The assay sample and buffer are incubated together with CyD-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the CyD concentration since CyD from samples and CyD-HRP conjugate compete for the anti-CyD antibody binding site. Since the number of sites is limited, as more sites are occupied by CyD from the sample, fewer sites are left to bind CyD-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The CyD concentration in each sample is interpolated from this standard curve. Intended Uses: This CyD ELISA kit is a 1.5-hour solid-phase ELISA designed for the quantitative determination of Human CyD. This ELISA kit for research use only, not for therapeutic or test applications!

NCBI AND UNIPROT INFORMATION

NCBI GI #	181245
NCBI GeneID	595
Molecular Weight	33,729 Da
NCBI Official Full Name	cyclin D
NCBI Official Synonym Full Names	cyclin D1
NCBI Official Symbol	CCND1
NCBI Official Synonym Symbols	BCL1; PRAD1; U21B31; D11S287E
NCBI Protein Information	G1/S-specific cyclin-D1; BCL-1 oncogene; PRAD1 oncogene; B-cell CLL/lymphoma 1; B-cell lymphoma 1 protein
UniProt Protein Name	G1/S-specific cyclin-D1
UniProt Gene Name	CCND1
UniProt Synonym Gene Names	BCL1; PRAD1; BCL-1
UniProt Entry Name	CCND1_HUMAN

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
