

Guinea Pig Thrombin-thrombomodulin complex ELISA Kit | T-TM elisa kit

Guinea Pig Thrombin-thrombomodulin complex ELISA Kit

CATALOG #
AAA83909

REACTIVITY
Guinea Pig

PRODUCT SYNONYMS

Thrombin-thrombomodulin complex; Guinea Pig Thrombin-thrombomodulin complex ELISA Kit; T-TM elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Guinea Pig
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Intended Uses	This TMTC ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Guinea pig TMTC. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for T-TM elisa kit

Principle of the assay: TMTC ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-TMTC antibody and an TMTC-HRP conjugate. The assay sample and buffer are incubated together with TMTC-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TMTC concentration since TMTC from samples and TMTC-HRP conjugate compete for the anti-TMTC antibody binding site. Since the number of sites is limited, as more sites are occupied by TMTC from the sample, fewer sites are left to bind TMTC-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TMTC concentration in each sample is interpolated from this standard curve.
