

Mouse Prokineticin 2 ELISA Kit | PK2 elisa kit

Mouse Prokineticin 2 ELISA Kit

CATALOG #
AAA84030

REACTIVITY
Mouse

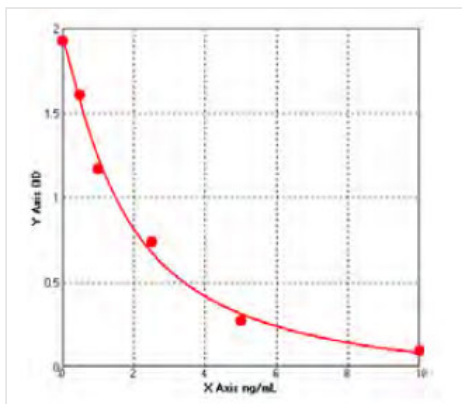

PRODUCT SYNONYMS

Prokineticin 2; Mouse Prokineticin 2 ELISA Kit; PK2 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Specificity	This assay has high sensitivity and excellent specificity for detection of PK2. No significant cross-reactivity or interference between PK2 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between PK2 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/ml
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PK2 elisa kit	Principle of the Assay: PK2 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-PK2 antibody and an PK2-HRP conjugate. The assay sample and buffer are incubated together with PK2-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PK2 concentration since PK2 from samples and PK2-HRP conjugate compete for the anti-PK2 antibody binding site. Since the number of sites is limited, as more sites are occupied by PK2 from the sample, fewer sites are left to bind PK2-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PK2 concentration in each sample is interpolated from this standard curve. Intended Uses: This PK2 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse PK2. This ELISA kit for research use only, not for therapeutic or test applications!
