

2, 3 Diphosphoglycerate ELISA Kit | 2, 3-DPG elisa kit

Rat 2, 3 Diphosphoglycerate ELISA Kit

CATALOG #
AAA84065

REACTIVITY
Rat

PRODUCT SYNONYMS

2; 3 Diphosphoglycerate; Rat 2; 3 Diphosphoglycerate ELISA Kit; 3-DPG elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Detection Range	0.5-10ug/mL
Sensitivity	0.1ug/ml
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for 2, 3-DPG elisa kit	For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate INTENDED USE This 2,3DPG ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat 2,3DPG. This ELISA kit for research use only! PRINCIPLE OF THE ASSAY2,3DPG ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-2,3DPG antibody and an 2,3DPG-HRP conjugate. The assay sample and buffer are incubated together with 2,3DPG-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the 2,3DPG concentration since 2,3DPG from samples and 2,3DPG-HRP conjugate compete for the anti-2,3DPG antibody binding site. Since the number of sites is limited, as more sites are occupied by 2,3DPG from the sample, fewer sites are left to bind 2,3DPG-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The 2,3DPG concentration in each sample is interpolated from this standard curve
--	---

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
