

Mouse Mullerian Inhibiting Substance/Anti-Mullerian hormone ELISA Kit | MIS/AMH elisa kit

Mouse Mullerian Inhibiting Substance/Anti-Mullerian hormone ELISA Kit

CATALOG # AAA84134	REACTIVITY Mouse
------------------------------	----------------------------

PRODUCT SYNONYMS

Mullerian Inhibiting Substance/Anti-Mullerian hormone; Mouse Mullerian Inhibiting Substance/Anti-Mullerian hormone ELISA Kit; Mullerian Inhibiting Substance/Anti-Mullerian hormone (Mouse); MIS/AMH elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, Plasma, Cell Culture Supernatants, Body Fluid And Tissue Homogenate
Assay Type	Quantitative Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for MIS/AMH elisa kit	Intended Uses: This AMH ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse AMH. This ELISA kit for research use only! Principle of the Assay: AMH ELISA kit applies the competitive enzyme immunoassay technique utilizing an anti-AMH antibody and an AMH-HRP conjugate. The assay sample and buffer are incubated together with AMH-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the AMH concentration since AMH from samples and AMH-HRP conjugate compete for the anti-AMH antibody binding site. Since the number of sites is limited, as more sites are occupied by AMH from the sample, fewer sites are left to bind AMH-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The AMH concentration in each sample is interpolated from this standard curve.
