

Human T Box Protein 3 ELISA Kit | TBX3 elisa kit

Human T Box Protein 3 ELISA Kit

CATALOG #
AAA84437

REACTIVITY
Human

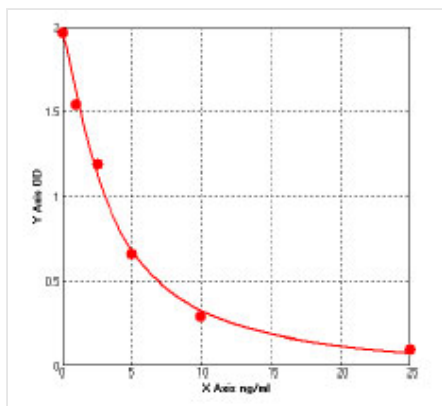

PRODUCT SYNONYMS

T Box Protein 3; Human T Box Protein 3 ELISA Kit; TBX3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Specificity	This assay has high sensitivity and excellent specificity for detection of TBP3. No significant cross-reactivity or interference between TBP3 and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between TBP3 and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ng/mL
Intended Uses	This TBX3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human TBX3. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for TBX3 elisa kit	Principle of the Assay: TBP3 ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-TBP3 antibody and an TBP3-HRP conjugate. The assay sample and buffer are incubated together with TBP3-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TBP3 concentration since TBP3 from samples and TBP3-HRP conjugate compete for the anti-TBP3 antibody binding site. Since the number of sites is limited, as more sites are occupied by TBP3 from the sample, fewer sites are left to bind TBP3-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TBP3 concentration in each sample is interpolated from this standard curve. Intended Uses: This TBP3 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human TBP3. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for TBX3 elisa kit	Signal Transduction

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
