

Mouse Liver glycogen ELISA Kit | LGC elisa kit

Mouse Liver glycogen ELISA Kit

CATALOG #
AAA84502

REACTIVITY
Mouse

PRODUCT SYNONYMS

Liver glycogen; Mouse Liver glycogen ELISA Kit; LGC elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ug/mL.
Preparation and Storage	Store all reagents at 2-8 degree C.

Intended Uses||This LGLY ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse LGLY. This ELISA kit for research use only!

Principle of the Assay: LGLY ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-LGLY antibody and an LGLY-HRP conjugate. The assay sample and buffer are incubated together with LGLY-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the LGLY concentration since LGLY from samples and LGLY-HRP conjugate compete for the anti-LGLY antibody binding site. Since the number of sites is limited, as more sites are occupied by LGLY from the sample, fewer sites are left to bind LGLY-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LGLY concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	2632187
NCBI Official Full Name	IgA, partial

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
