

Mouse Prostaglandin F2a ELISA Kit | PGF2a elisa kit

Mouse Prostaglandin F2a ELISA Kit

CATALOG #
AAA84517

REACTIVITY
Mouse

PRODUCT SYNONYMS

Prostaglandin F2a; Mouse Prostaglandin F2a ELISA Kit; PGF2a elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Mouse
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	2.5-50ng/mL
Sensitivity	0.1ng/mL
Intended Uses	This PGF2a ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Mouse PGF2a. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for PGF2a elisa kit

Principle of the assay: PGF2a ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-PGF2a antibody and an PGF2a-HRP conjugate. The assay sample and buffer are incubated together with PGF2a-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PGF2a concentration since PGF2a from samples and PGF2a-HRP conjugate compete for the anti-PGF2a antibody binding site. Since the number of sites is limited, as more sites are occupied by PGF2a from the sample, fewer sites are left to bind PGF2a-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PGF2a concentration in each sample is interpolated from this standard curve.

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
