

Rabbit Troponin I Type 3, Cardiac ELISA Kit | cTnI elisa kit

Rabbit Troponin I Type 3, Cardiac ELISA Kit

CATALOG #
AAA84521

REACTIVITY
Rabbit

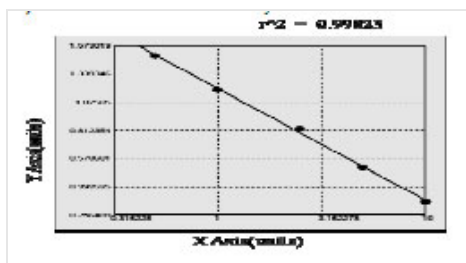

PRODUCT SYNONYMS

Troponin I Type 3; Cardiac; Rabbit Troponin I Type 3; Cardiac ELISA Kit; cTnI elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Sensitivity	0.1 ng/mL.
Preparation and Storage	Store all reagents at 2-8 degree C

Related Product Information for cTnI elisa kit

Intended Uses: This TNNI3/cTn-I ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rabbit TNNI3/cTn-I. This ELISA kit for research use only!

Principle of the Assay||TNNI3/cTn-I ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-TNNI3/cTn-I antibody and an TNNI3/cTn-I-HRP conjugate. The assay sample and buffer are incubated together with TNNI3/cTn-I-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the TNNI3/cTn-I concentration since TNNI3/cTn-I from samples and TNNI3/cTn-I-HRP conjugate compete for the anti-TNNI3/cTn-I antibody binding site. Since the number of sites is limited, as more sites are occupied by TNNI3/cTn-I from the sample, fewer sites are left to bind TNNI3/cTn-I-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The TNNI3/cTn-I concentration in each sample is interpolated from this standard curve.
