

Human Liver specific lipoprotein ELISA Kit | LSP elisa kit

Human Liver specific lipoprotein ELISA Kit

CATALOG #
AAA84673

REACTIVITY
Human

PRODUCT SYNONYMS

Liver specific lipoprotein; Human Liver specific lipoprotein ELISA Kit; LSP elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive or Sandwich
Detection Range	250-5000pg/mL
Sensitivity	1.0pg/mL
Intended Uses	This LPS ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human LPS. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for LSP elisa kit

Principle of the Assay: LPS ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for LPS. Standards or samples are then added to the microtiter plate wells and LPS if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of LPS present in the sample, a standardized preparation of horseradish peroxidase (HRP) -conjugated polyclonal antibody, specific for LPS are added to each well to "sandwich" the LPS immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain LPS and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The LPS concentration in each sample is interpolated from this standard curve.

NCBI AND UNIPROT INFORMATION

NCBI GI #	581127
UniProt Accession #	P00804
Molecular Weight	18,156 Da
NCBI Official Full Name	lsp, partial
UniProt Protein Name	Lipoprotein signal peptidase
UniProt Gene Name	IspA
UniProt Synonym Gene Names	lsp; b0027; JW0025; SPase II
UniProt Entry Name	LSPA_ECOLI

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
