

Rabbit Fibrinopeptide B ELISA Kit | FPB elisa kit

Rabbit Fibrinopeptide B ELISA Kit

CATALOG #
AAA84705

REACTIVITY
Rabbit

PRODUCT SYNONYMS

Fibrinopeptide B; Rabbit Fibrinopeptide B ELISA Kit; FPB elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rabbit
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Sandwich
Detection Range	5000pg/mL
Sensitivity	1.0pg/mL
Intended Uses	This FPB ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Ratbbit FPB. This ELISA kit for research use only, not for therapeutic applications!
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for FPB elisa kit

Principle of the Assay: FPB ELISA kit applies the competitive enzyme immunoassay technique utilizing a monoclonal anti-FPB antibody and an FPB-HRP conjugate. The assay sample and buffer are incubated together with FPB-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the FPB concentration since FPB from samples and FPB-HRP conjugate compete for the anti-FPB antibody binding site. Since the number of sites is limited, as more sites are occupied by FPB from the sample, fewer sites are left to bind FPB-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The FPB concentration in each sample is interpolated from this standard curve.
