| Related Product Information for SsDNA elisa kit | Intended Uses: This Anti-RV Ab ELISA kit is intended Laboratory for Research use only. The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration of Anti-RV Ab in the sample, this Anti-RV Ab ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a cutoff value. The existence or not of Anti-RV Ab in the samples is then determined by comparing the O.D. of the samples to the CUT OFF. |
