

Human Apelin 13 ELISA Kit | Apelin13 elisa kit

Human Apelin 13 ELISA Kit

CATALOG #
AAA84869

REACTIVITY
Human

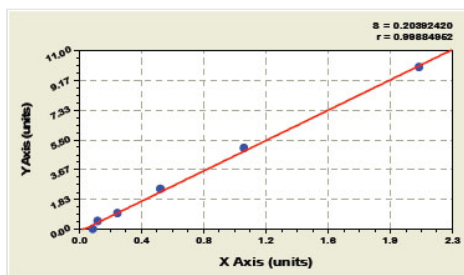

PRODUCT SYNONYMS

Apelin 13; Human Apelin 13 ELISA Kit; Apelin13 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Human
Samples	Serum, plasma, Cell Culture Supernatants, body fluid and tissue homogenate
Assay Type	Competitive
Detection Range	10-250ng/mL
Sensitivity	1.0ng/mL
Highest Standards	250ng/mL
Concentration of Standards	Concentration of Standards
Preparation and Storage	Store all reagents at 2-8 degree C.

ADDITIONAL INFORMATION

Related Product Information for Apelin13 elisa kit	For samples: Serum, plasma, cell culture supernatants, body fluid and tissue homogenate Intended Uses: This Apelin-13 ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Human Apelin-13. This ELISA kit for research use only! Principle of the Assay: Apelin-13 ELISA kit applies the quantitative sandwich enzyme immunoassay technique. The microtiter plate has been pre-coated with a monoclonal antibody specific for Apelin-13. Standards or samples are then added to the microtiter plate wells and Apelin-13 if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount of Apelin-13 present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific for Apelin-13 are added to each well to "sandwich" the Apelin-13 immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, substrate solutions are added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period. Only those wells that contain Apelin-13 and enzyme-conjugated antibody will exhibit a change in color. The enzyme-substrate reaction is terminated by addition of a sulphuric acid solution and the color change is measured spectrophotometrically at a wavelength of 450 nm. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The Apelin-13 concentration in each sample is interpolated from this standard curve.
Product Categories/Family for Apelin13 elisa kit	Neurobiology

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
