

Rat Protein S ELISA Kit | Protein S elisa kit

Rat Protein S ELISA Kit

CATALOG #
AAA84998

REACTIVITY
Rat

PRODUCT SYNONYMS

Protein S; Rat Protein S ELISA Kit; Rat Protein S (Protein S) ELISA Kit; Protein S (Rat); Protein S elisa kit

PRODUCT SPECIFICATIONS

Reactivity	Rat
Specificity	This assay has high sensitivity and excellent specificity for detection of PROS. No significant cross-reactivity or interference between PROS and analogues was observed. NOTE: Limited by current skills and knowledge, it is impossible for us to complete the cross-reactivity detection between PROS and all the analogues, therefore, cross reaction may still exist in some cases.
Assay Type	Quantitative Competitive
Samples	Serum, plasma, cell culture supernatants, body fluid and tissue homogenate
Sensitivity	0.1 ug/mL
Preparation and Storage	Store all reagents at 2-8 degree C

ADDITIONAL INFORMATION

Related Product Information for Protein S elisa kit	Principle of the Assay: PROS ELISA kit applies the competitive enzyme immunoassay technique utilizing a polyclonal anti-PROS antibody and an PROS-HRP conjugate. The assay sample and buffer are incubated together with PROS-HRP conjugate in pre-coated plate for one hour. After the incubation period, the wells are decanted and washed five times. The wells are then incubated with a substrate for HRP enzyme. The product of the enzyme-substrate reaction forms a blue colored complex. Finally, a stop solution is added to stop the reaction, which will then turn the solution yellow. The intensity of color is measured spectrophotometrically at 450nm in a microplate reader. The intensity of the color is inversely proportional to the PROS concentration since PROS from samples and PROS-HRP conjugate compete for the anti-PROS antibody binding site. Since the number of sites is limited, as more sites are occupied by PROS from the sample, fewer sites are left to bind PROS-HRP conjugate. A standard curve is plotted relating the intensity of the color (O.D.) to the concentration of standards. The PROS concentration in each sample is interpolated from this standard curve. Intended Uses: This PROS ELISA kit is a 1.5 hour solid-phase ELISA designed for the quantitative determination of Rat PROS. This ELISA kit for research use only, not for therapeutic or test applications!
Product Categories/Family for Protein S elisa kit	Rat ELISA Kit

NCBI AND UNIPROT INFORMATION

NCBI GI #	7717469
NCBI Official Full Name	protein S

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
