

GuineaPig 25-Dihydroxy vitamin D3 ELISA Kit | HVD3 elisa kit

Guinea Pig 25-Dihydroxy vitamin D3 ELISA Kit

CATALOG #
AAA85023

REACTIVITY
GuineaPig

PRODUCT SYNONYMS

25-Dihydroxy vitamin D3; Guinea Pig 25-Dihydroxy vitamin D3 ELISA Kit; Guinea Pig Pig 25-Dihydroxy vitamin D3 ELISA Kit; 25-Dihydroxy vitamin D3 (Guinea Pig Pig); HVD3 elisa kit

PRODUCT SPECIFICATIONS

Reactivity	GuineaPig
Assay Type	Sandwich
Preparation and Storage	Store all reagents at 2-8 degree C

Standard Curve (Sample)

ADDITIONAL INFORMATION

Related Product Information for HVD3 elisa kit	Intended Uses: This HVD3 ELISA kit is intended Laboratory for research use only.The Stop Solution changes the color from blue to yellow and the intensity of the color is measured at 450 nm using a spectrophotometer. In order to measure the concentration ofHVD3 in the sample, thisHVD3 ELISA Kit includes a set of calibration standards. The calibration standards are assayed at the same time as the samples and allow the operator to produce a standard curve of Optical Density versusHVD3 concentration. The concentration ofHVD3 in the samples is then determined by comparing the O.D. of the samples to the standard curve. Principle of the Assay: This HVD3 enzyme linked immunosorbent assay applies a technique called a quantitative sandwich immunoassay. The microtiter plate provided in this kit has been pre-coated with a monoclonal antibody specific forHVD3. Standards or samples are then added to the microtiter plate wells andHVD3 if present, will bind to the antibody pre-coated wells. In order to quantitatively determine the amount ofHVD3 present in the sample, a standardized preparation of horseradish peroxidase (HRP)-conjugated polyclonal antibody, specific forHVD3 are added to each well to "sandwich" theHVD3 immobilized on the plate. The microtiter plate undergoes incubation, and then the wells are thoroughly washed to remove all unbound components. Next, A and B substrate solution is added to each well. The enzyme (HRP) and substrate are allowed to react over a short incubation period.Only those wells that containHVD3 and enzyme-conjugated antibody will exhibit a change in colour. The enzyme-substrate reaction is terminated by the addition of a sulphuric acid solution and the colour change is measured spectrophotometrically at a wavelength of 450 nm.
Product Categories/Family for HVD3 elisa kit	Guinea Pig ELISA Kit

For Research Use Only. Not for use in diagnostic or therapeutic procedures. Small volumes of product may become entrapped in the seal of the vial during shipment and storage; if necessary, briefly centrifuge the vial on a tabletop centrifuge to dislodge any liquid in the cap.
